

# B2M project : a new design of EasyDP<sup>®</sup> system for French navy vessels

Kership selected Sirehna to install its EasyDP<sup>®</sup> Dynamic Positioning system on the three future B2M (Batiment Multi Mission) for French Navy.

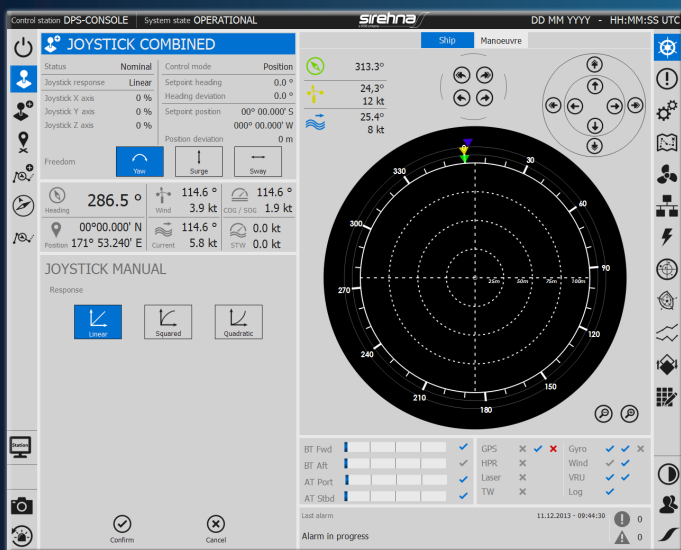

The B2M are multi-mission vessels with a displacement of 1000t and a length of 65 m.

They are intended to operate in Polynesia, Antilles-Guiana and New Caledonia areas.

Sirehna's new generation EasyDP<sup>®</sup> aims to be more user friendly, easy to use and consistent with the latest IMO standards for both Dynamic Positioning and Track Control System.

The system can be easily adapted to military, offshore, maintenance vessels, or mega-yachts and also to ship modes of operation and bridge design and look & feel.

## B2M: Multi Mission Vessels

Built in Concarneau by Kership (Piriou and DCNS joint venture), the three ships will receive Sirehna system at the beginning of the year 2015 ; the sea trials will be performed at the end of 2015 (for the first one) and 2016.
